

# About Phenom.Earth Docs

Phenom-Earth is a project springing  
from the passion of Lenval Logan to  
chase the unknown.

This site provides information for the Phenom App team responsible for building and maintaining the app related to the investigation of UFOs and the collection of UAP data for the purpose of gathering and analyzing sighting reports from the widest possible gamut of witnesses.

## About Logan's Work

- Logan is a former Air Force intelligence analyst and UAP task force member.
- He joined the UAP task force in 2018.
- He developed the Phenom app to collect UAP sighting data and engage the public in the investigation of UAP.
- He believes the stigma around UFO reporting remains, despite some progress in acceptance.

- Logan witnessed multiple UFO incidents, including a Calvine-like craft, while in military service.
- As seen here on the Joe Rogan Bullshit Hour

Joe Rogan Experience #2264 - Lenva Logan & Jason Sands

## Key Takeaways

- Government UAP investigations are heavily compartmentalized with limited information sharing.
- Public participation and data collection are crucial for understanding the phenomenon.

- Civilian data collection and analysis may be key to understanding the UFO phenomenon beyond classified government efforts.
- Cultural differences affect how people approach and interpret unexplained phenomena.
- The UFO topic involves both technical analysis and potentially metaphysical/“woo” aspects that warrant investigation.
- Government UFO programs have been limited by funding, bureaucracy, and institutional resistance.
- Scientific investigation of UFOs requires examining multiple types of evidence and remaining open to unexpected possibilities.
